## Course Outline

<b>Course: MPM2D Mathematics</b>			
<b>Grade:</b> 10	<b>Type:</b> U C M O E	<b>Credit Value:</b> 1 <b>Credit hours:</b> 110	<b>Course code:</b> MPM2D <b>Dept:</b> Mathematics
<b>Teacher:</b> Ryan Kwok		<b>Development date:</b> September 4, 2020	
<b>Course Reviser:</b> J.F. Michaud <b>Date:</b>		<b>Prerequisites:</b> Grade 9 Mathematics, Academic	
<b>Resources Required:</b> electronic device with internet access <b>Text book:</b> none required Supplementary resources: Principles of Mathematics 9, McGraw-Hill Ryerson Principles of Mathematics 9, Nelson Education			
<b>Ministry Curriculum Documents:</b> <ul style="list-style-type: none"><li>- The Ontario Curriculum - Grades 9 and 10 Mathematics 2005</li><li>- Growing Success – Assessment, Evaluation and Reporting in Ontario Schools-2010</li><li>- Learning for All – A Guide to Effective Assessment and Instruction for All Students, Kindergarten to Grade 12, 2001</li><li>- Environmental Education: Scope and Sequence of Expectations, 2017</li><li>- Course Descriptions and Prerequisites, Grades 9 to 12, 2018</li><li>- Equity and Inclusive Education in Ontario Schools: Guidelines for Policy Development and Implementation</li><li>- Financial Literacy: Scope and Sequence of Expectations, Grades 9-12, 2016</li><li>- First Nations, Métis, and Inuit Connections – Scope and Sequence of Expectations, 2016</li><li>- Health and Safety: Scope and Sequence of Expectations, Grades 9–12, 2017</li></ul>			
<b>Course Description</b> <p>This course enables students to broaden their understanding of relationships and extend their problem-solving and algebraic skills through investigation, the effective use of technology, and abstract reasoning. Students will explore quadratic relations and their applications; solve and apply linear systems; verify properties of geometric figures using analytic geometry; and investigate the trigonometry of right and acute triangles. Students will reason mathematically and communicate their thinking as they solve multi-step problems.</p>			

# Canada World Education

## Overall Expectations

By the end of this course, students will:

- determine the basic properties of quadratic relations;
- relate transformations of the graph of  $y = x^2$  to the algebraic representation  $y = a(x - h)^2 + k$ ;
- solve quadratic equations and interpret the solutions with respect to the corresponding relations;
- solve problems involving quadratic relations
- model and solve problems involving the intersection of two straight lines;
- solve problems using analytic geometry involving properties of lines and line segments;
- verify geometric properties of triangles and quadrilaterals, using analytic geometry.
- use their knowledge of ratio and proportion to investigate similar triangles and solve problems related to similarity;
- solve problems involving right triangles, using the primary trigonometric ratios and the Pythagorean theorem;
- solve problems involving acute triangles, using the sine law and the cosine law.

### Outline of course content :

<b>Unit 1:</b> Systems of Linear Equations	Hours: 10
<b>Unit 2:</b> Analytic Geometry: Line Segments and Circles	Hours: 15
<b>Unit 3:</b> Graphs of Quadratic Relations	Hours: 10
<b>Unit 4:</b> Factoring Algebraic Expressions	Hours: 13.5
<b>Unit 5:</b> Applying Quadratic Models	Hours: 15
<b>Unit 6:</b> Quadratic Equations	Hours: 15
<b>Unit 7:</b> Similar Triangles and Trigonometry	Hours: 15
<b>Unit 8:</b> Acute Triangle Trigonometry	Hours: 15
Exam	Hours: 1.5
	Total hours: 110

**All components of the course are delivered online**

### Mark reporting

Student marks will be posted online so that parents and students can see student progress and current marks through a secure reporting software.

### Mark breakdown

Evaluations Throughout the course: 70% of final grade

Final Evaluation: 30% of final grade

The term work and Exam will be broken down in the following skill Categories:

Knowledge and Understanding    30%

# Canada World Education

Thinking	20%
Communication	20%
Application	30%

The activities completed during the course will account for the following percentages:

Assignments	22%
Quizzes	15%
Tests	23%
Exam	30%

## Achievement levels

<b>Level 1 50-59%</b>	<b>Level 2 60-69%</b>	<b>Level 3 70-79%</b>	<b>Level 80-100%</b>
-----------------------	-----------------------	-----------------------	----------------------

## Teaching and Learning Strategies

Teachers use a variety of teaching strategies to maximize student learning. The following teaching strategies will be used in this course:

Teacher will utilize instruction that both responds to the characteristics of a diverse group of students and is precisely tailored to the unique strengths and needs of each student can be achieved using the principles and guidelines associated with three instructional approaches:

- 1) Universal Design for Learning (UDL),
- 2) differentiated instruction, and
- 3) the tiered approach to prevention and intervention. (Learning for All, Kindergarten to Grade 12: For more info please see <http://www.edu.gov.on.ca/eng/general/elemsec/speced/LearningforAll2013.pdf>)

What are UDL-aligned strategies? <https://goalbookapp.com/toolkit/strategies>

- UDL-aligned strategies are instructional methods and tools used by teachers to ensure that ALL students have an equal opportunity to learn. All of our strategies are aligned with Universal Design for Learning (UDL) guidelines. These guidelines help you to select strategies that remove barriers in instruction so that all students can achieve their learning goals.
- Differentiated Instruction is based on the idea that because students differ significantly in their interests, learning styles, and readiness to learn, it is necessary to adapt instruction to suit these differing characteristics. Teachers can differentiate one or a number of the following elements in any classroom learning situation (Tomlinson,

# Canada World Education

2004): the content of learning (what students are going to learn, and when); the process of learning (the types of tasks and activities); the products of learning (the ways in which students demonstrate learning); the affect/environment of learning (the context and environment in which students learn and demonstrate learning).

(<http://edugains.ca/newsite/di/index.html> )

Teaching and learning strategies adopted should be appropriate to the course type and should reflect an appropriate balance of theoretical components, practical applications for the course and appropriate to the range of student learning.

Helping students become self-directed.

In order to address the unique learning styles of students in this course, a variety of activities and learning experiences should be offered, including, but not restricted to: questioning, demonstrations, role-plays, simulations, co-operative group learning, brainstorming, discussion, peer coaching, interviewing, reflective writing, reflective thinking exercises, concept mapping, reading, tutoring, direct instruction, one-on-one teaching, and experiential learning.

Teachers will find ways throughout the course for students to make authentic learning connections with their other courses, the school, local community and the world at large.

### Examples of teaching strategies:

<ul style="list-style-type: none"> <li>• Brainstorming</li> <li>• Be the teacher</li> <li>• Case Studies</li> <li>• Computer technology – reports, spreadsheets, flow charts , data bases, electronic presentation;</li> <li>• Conferences</li> <li>• Documentaries/Videos /Ted Talks/Video critique</li> <li>• Flexible Grouping</li> <li>• Focus Groups–Informal discussions based on focus questions</li> <li>• Formal Debates/Informal debates</li> <li>• Graphic Organizers</li> <li>• Group critique</li> <li>• Group Discussions</li> <li>• Independent Study</li> <li>• Informal Debates</li> <li>• Internet Based Research/Investigation</li> <li>• Interview</li> <li>• Investigative and inquiry questions</li> </ul>	<ul style="list-style-type: none"> <li>• Media Presentation</li> <li>• Peer feedback</li> <li>• Planning and writing analytical pieces of work</li> <li>• Provide specialized vocabulary</li> <li>• Reading: read for meaning</li> <li>• Reading: to develop the ability to use specialized vocabulary</li> <li>• Research Project –individual</li> <li>• Research Project-group</li> <li>• Role-play</li> <li>• Seminar</li> <li>• Skype interviews</li> <li>• Socratic Teaching</li> <li>• Structured discussion</li> <li>• Think-Pair Share</li> <li>• UDL-Aligned Strategies (see <a href="https://goalbookapp.com/toolkit/strategies">https://goalbookapp.com/toolkit/strategies</a>)</li> <li>• Write or give a personal perspective in</li> </ul>

		discussions
<p><b>Assessment &amp; Evaluation of Student Performance</b></p> <p><b>Assessment &amp; Evaluation</b></p> <p>The primary purpose of assessment and evaluation is to improve student learning and to help students assume responsibility for their learning.</p> <p>Mid-term and final marks are determined through evaluations or Assessments of Learning, which typically occur towards the end of a unit and end of the term. During the learning process, information about a student's learning is gathered and used by the teacher and student to inform decisions that affect goal setting and teaching in the classroom. The data gathered as Assessment as Learning and Assessment for Learning do not carry a mark weight, but do play a crucial role in student success as they help inform the teacher about each student's progress. All types of assessments allow teachers to provide descriptive feedback that is clear, specific, meaningful, and timely to support improved learning and achievement.</p> <p>Learning Skills and Work Habits (responsibility, organization, independent work, collaboration, initiative, self-regulation) will be reported by a letter (E = Excellent, G = Good, S = Satisfactory, N = Needs Improvement). These skills and habits support a high level of success in meeting the course expectations in addition to contributing to the development of positive life and work skills for the future.</p>

<p><b>Observation</b></p> <ul style="list-style-type: none"> <li>● Checklist/Feedback for group discussion</li> <li>● Peer rating on presentations</li> <li>● Teacher anecdotal feedback</li> <li>● Teacher feedback for a task</li> <li>● Teacher rating for a task</li> <li>● Whole class discussion</li> </ul>	<p><b>Observation</b></p> <ul style="list-style-type: none"> <li>● Class discussions</li> <li>● Demonstrations</li> <li>● Informal debate</li> <li>● Performance tasks</li> <li>● Presentations</li> <li>● Role Play</li> </ul>
<p><b>Conversation</b></p> <ul style="list-style-type: none"> <li>● Student teacher conversations</li> <li>● Questioning</li> <li>● Moderated group discussions</li> <li>● Peer-Oral feedback</li> </ul>	<p><b>Conversation</b></p> <ul style="list-style-type: none"> <li>● Brainstorming</li> <li>● Debate</li> <li>● Focused Conversations</li> <li>● Oral pre-tests</li> <li>● Oral quizzes</li> <li>● Interviews</li> <li>● Pair work</li> <li>● Group work</li> <li>● Portfolio conferencing</li> <li>● Student teacher conferences</li> </ul>
<p><b>Considerations for Program Planning</b></p> <ul style="list-style-type: none"> <li>● Individual Education Plan: Accommodations to meet the needs of exceptional students as set out in their Individual Education Plan will be implemented within the classroom program. Additional assistance is available through tutoring.</li> <li>● The Role of Technology in the Curriculum. Using information technology will assist students in the achievement of many of the expectations in the curriculum regarding research, written work, analysis of information, and visual presentations.</li> <li>● English As a Second Language (ESL): Appropriate accommodations in teaching, learning, and evaluation strategies will be made to help ESL students gain proficiency in English.</li> <li>● Programs will involve an open, collaborative, activity-based approach to teaching that accommodates students' interests, aspirations, and learning styles. Activities will be designed to include both individual and team approaches, with emphasis on equity and inclusive education, financial literacy, careers, and health and safety.</li> </ul>	

# Canada World Education

## **Program Planning Characteristics**

- knowledge and skilled based
- developmentally appropriate to the learner
- inquiry based
- holistic, taking the whole student attributes such as cognitive, emotional, social and physical.
- transformational, helping students grow and reach their potential
- inclusive, engaging all students
- differentiated to meet students learning and motivational needs
- well documented, information shared on an ongoing basis with students and parents

## **Technological Devices:**

Any device with windows 8 or newer will work on the software used for all courses.

For Online courses Electronic devices are necessary to access the course content and lessons. However, it is strongly recommended that students use other means such as paper and pencil when comprehension skills are required.

CWEC supports the use of technology to enhance learning, but the use of such electronic technology in the classroom is at the discretion of the teacher. Working together we can ensure the appropriate use of technology by all members of our school community.
